Project Description:

The purpose of conducting this analysis to show more insights and in-depth knowledge of the analysis of all the revenue generated in each countries and cities and its tours, by doing so it will help assist in making a more calculated decisions about tour planning.

Key questions:

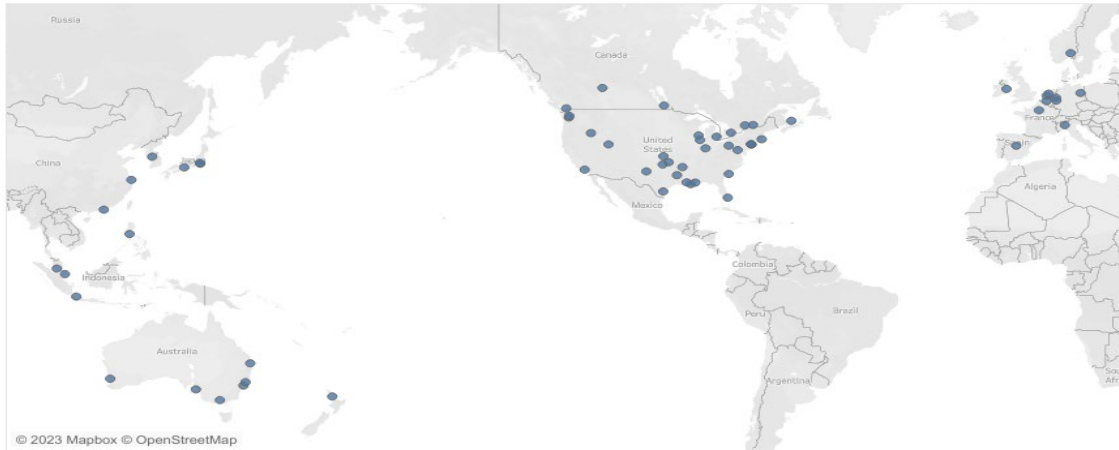

1. *Which cities and countries have hosted the most concerts, and what were the average attendance and revenue figures in each location?*
2. *What are the top opening acts in terms of attendance, and how many times have they performed?*
3. *How do attendance and revenue figures vary across different tours, and what are the trends over time?*
4. *What is the average percentage of tickets sold compared to available tickets for each venue?*
5. *Are there any noticeable differences in attendance between weekdays and weekends?*
6. *What are the patterns in ticket pricing, and how do they relate to the total revenue generated?*

Findings & Insights

1. Which cities and countries have hosted the most concerts, and what were the average attendance and revenue figures in each location?

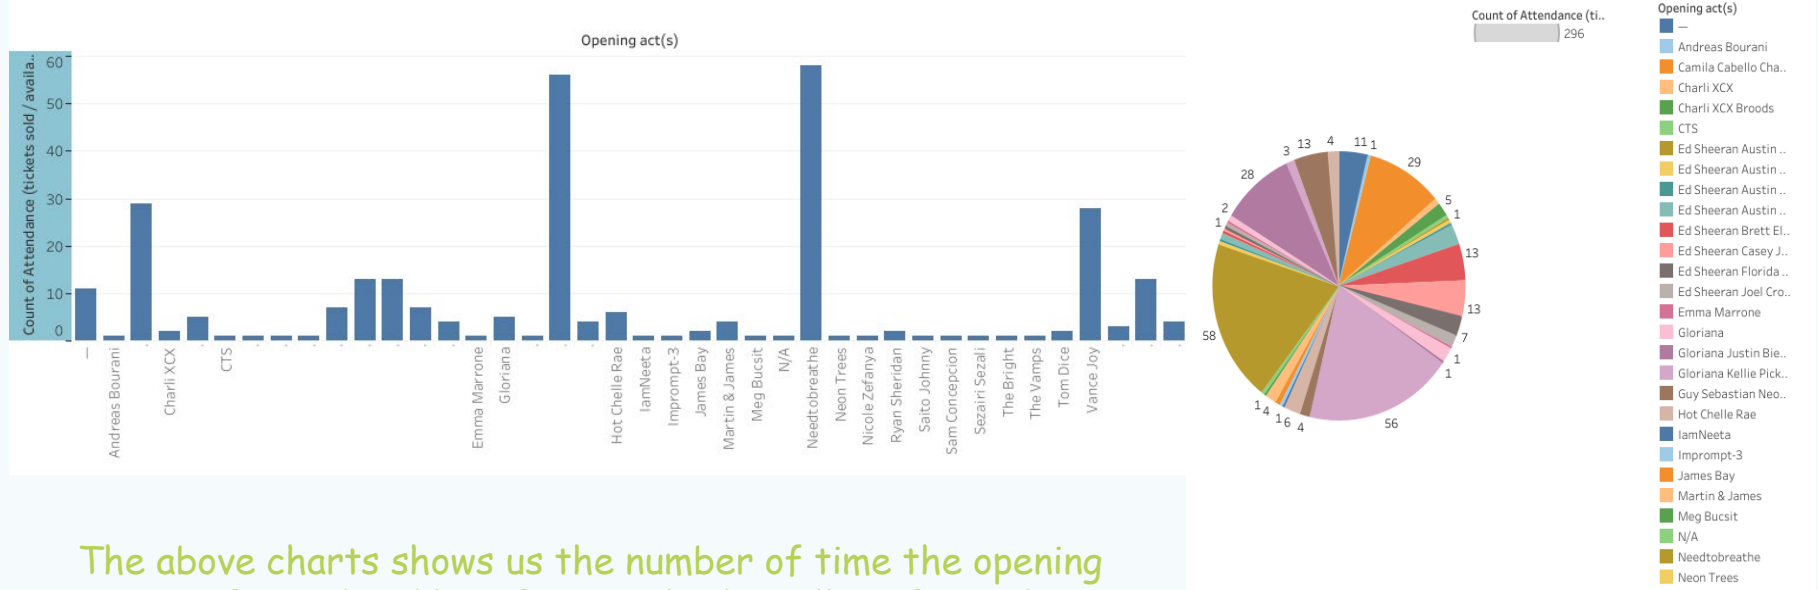

The map above presents the concentration of concerts hosted across various regions. This table above further presents this analysis, and it shows that the total concerts and total revenue generated are from the United States.

Country	Avg. Revenue	Distinct count of Attendance (tickets sold / av..
United States	3,192,669	212
Spain	251,864	1
South Korea	385,374	1
Singapore	2,219,500	3
Scotland	1,119,300	1
Philippines	1,185,350	2
Norway	815,246	1
Northern Ireland	379,001	1
New Zealand	3,202,148	3
Netherlands	524,572	2
Malaysia	998,608	1
Japan	5,956,032	5
Italy	153,303	1
Ireland	3,654,362	3
Indonesia	1,481,473	1
Hong Kong	1,030,633	1
Germany	1,059,908	3
France	201,781	1
England	3,509,319	8
China	3,891,141	2
Canada	3,420,883	19
Belgium	219,212	1
Australia	3,667,939	22
Grand Total	3,148,507	294

AVERAGE of Revenue vs. Tour

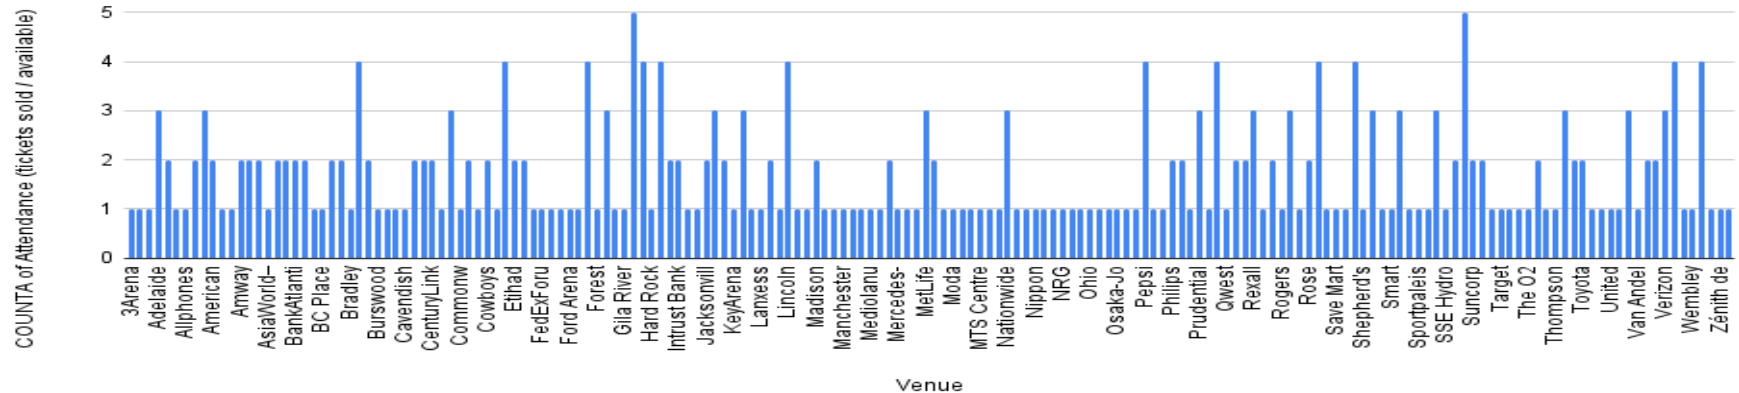

From the chart presented above, we noted that the Reputation Stadium Tour has the most attendance and consequently generates the most revenue.

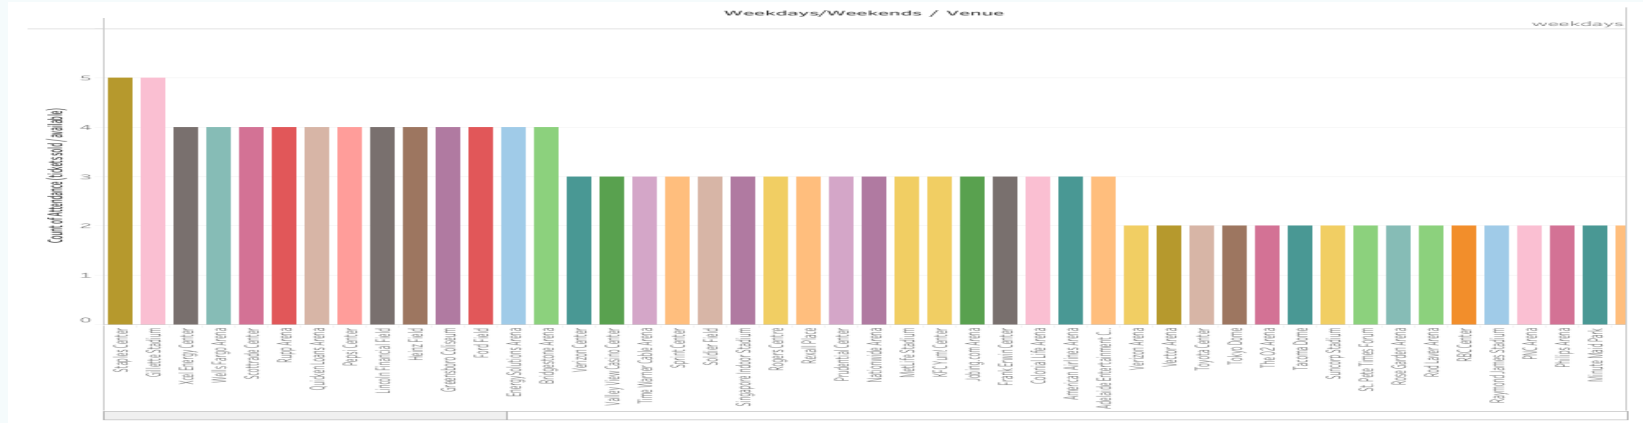

4. What is the average percentage of tickets sold compared to available tickets for each venue?

COUNTA of Attendance (tickets sold / available) vs. Venue

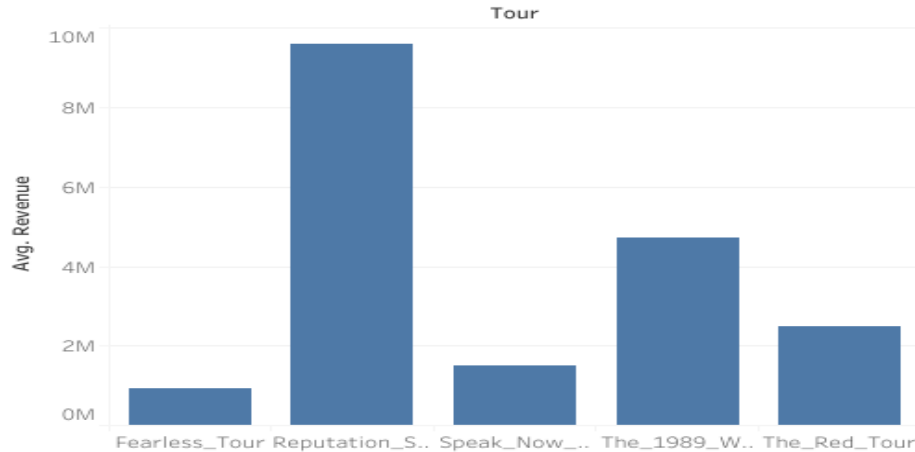

From the chart presented above, we can see numbers of tickets sold and was available for each venue.

5. Are there any noticeable differences in attendance between weekdays and weekends?

With the above chart we will see that the first two basically has the most attendance which are **Staples center** and **Gillette stadium** which happened on a weekday.

6. What are the patterns in ticket pricing, and how do they relate to the total revenue generated?

Tour	
Fearless_Tour	917,052
Reputation_Stadium_Tour	9,597,457
Speak_Now_World_Tour	1,508,435
The_1989_World_Tour	4,730,813
The_Red_Tour	2,503,083
Grand Total	3,148,507

The above table shows that the reduced revenue from Fearless tour is driven by a reduction in the number of tickets sold, Total number of tickets sold are: **3,148,507**

Summary of findings:

- ❖ The United States accounts for the largest total revenue generated by Taylor Train Concert Management and the concerts held there is more than any concerts held in any other locations.
- ❖ Taylor Train Concert Management has a good record and near 100% probability of selling out all available tickets for any venue hosting a concert.
- ❖ The **Reputation Stadium Tour** attracts the most attendance and generates the highest revenue among other tours.
- ❖ Fearless tours generates the lowest revenue and attendance, which brings its part due to its limitation in tickets available and lower pricing strategy.

Recommended actions:

For future references Taylor Train concert management needs to follow the below plan as it will be helpful in planning for future concerts.

- ❖ *The team need to embark on strategies for improving the average price of tickets for Fearless tours also the price per ticket for this tour it will improve its revenue.*
- ❖ *The management team should continually focus on hosting the most tours in the United States, as the account has the most attendance and revenue generated.*
- ❖ *To improve attendance and revenue, the planning team could replace artists selected for opening acts generating underperforming results.*

Conclusion

Customer satisfaction is expected to improve if recommendations shown in previous slide is followed, the revenue generated by the team and the attendance will drastically change.

Thank you!
